Douglas P. Kent is an experienced software engineer and web site developer, specializing in full-stack development of enterprise-scale websites using state-of-the-art technologies and architectures, including single page applications and service-oriented architectures using .NET Core/C#, Aurelia/Typescript and SQL Server.

Doug has two masters degrees, from Duke University, specializing in risk assessment and decision analysis.

He has dual citizenship in the U.S. and Canada and holds a British passport.

His experience may be summarized as follows:

- *28.5 years* of professional employment
- *26.5 years* in **software engineering**
- *15.5 years* of [web development](#) at Fortune #4 ([Ford.com](#)) and other companies.
- *2 years* of **Service-Oriented (SOA), Single Page Application (SPA) web architectures**
- *12 years* of **.NET and C#** programming
- *5 years* of [management and lead experience](#) at [Microsoft Corp.](#) and other companies, including coordinating offshore teams.
- [Application development](#), including six commercial **Windows** products to **market release**, *five* of them in [lead](#) positions.

Douglas has worked in a wide range of development environments, from the best software engineering companies in the world to dotcoms to garage startups. He has the maturity and experience to design, develop, coordinate, and lead a team from product conception to release.

If you are interested, please refer to Douglas' [Summary Resume](#) or [Detailed Work History](#) or contact him at your earliest convenience. He will be happy to provide code samples and excellent references.
